

MEKALA YAKSHITH REDDY

SOFTWARE DEVELOPMENT ENGINEER | JAVA | MERN STACK

Hyderabad, India | Seeking SDE Internship Opportunities | Open to Relocation

+91 8790512825 | yakshithreddym@gmail.com | www.linkedin.com/in/yakshithreddy | www.github.com/yakshithmekala

PROFESSIONAL SUMMARY

Software Development Engineer with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in building scalable web applications using Java and the MERN stack, with hands-on experience in backend development and REST APIs.

Solved 500+ coding problems and actively seeking SDE Internship opportunities focused on backend and scalable systems.

EDUCATION

B.Tech in Computer Science Engineering (Expected 2027)

KL University, Hyderabad | CGPA: 9.46

Intermediate (MPC) – Narayana Junior College | CGPA: 9.4

SSC – Sankalp High School | CGPA: 10.0

PROJECTS

JPMorgan Chase & Co. – Code for Good (Participant) June 2025

- Built a scalable full-stack web application to manage 500+ student records, reducing manual processing.
- Integrated secure authentication and database systems using MERN stack and MongoDB.
- Optimized REST APIs for efficient data handling and faster data retrieval.
- Created a responsive user interface to improve usability and enhance user experience.
- Collaborated in a team environment to deliver a functional solution under tight deadlines.

Tech Stack: MERN, MongoDB, React, Node.js, Express

AI Code Reviewer | <https://github.com/yakshithmekala/ai-code-reviewer>

- Engineered an AI-based code analysis tool to detect bugs and improve code quality, reducing manual review effort by ~30%.
- Implemented automated feedback to enforce coding standards.
- Designed real-time processing for faster debugging and improved productivity.
- Reduced manual code review effort through automated insights.

Tech Stack: Python, APIs

CIBIL Risk Manager | <https://github.com/yakshithmekala/cibil-risk>

- Developed a credit risk evaluation system analyzing financial and CIBIL data for 100+ sample records.
- Designed classification models to categorize users into risk levels.
- Built backend logic for secure and efficient data processing.
- Improved decision-making using structured risk insights.

Tech Stack: Python, Backend, APIs

SKILLS

Languages: Java, Python, C

Web: HTML, CSS, JavaScript, React.js, Node.js, Express.js

Databases: MySQL, MongoDB

Core: Data Structures, Algorithms, OOP, DBMS

Tools: Git, GitHub, REST APIs, FastAPI

Other: JWT Authentication, Postman, Docker (basic), Linux (basic), System Design (basic)

ACHIEVEMENTS & CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- AWS Cloud Practitioner – Amazon Web Services
- MongoDB Database Administrator (DBA)
- MongoDB Associate Developer
- Automation Anywhere RPA Professional
- Participant – JPMorgan Chase Code for Good 2025
